

Medical and Environmental Management Division CODE 250

Hazardous Materials Management System (HMMS)

Introduction

The Hazardous Materials Management System (HMMS) tracks hazardous material data. All hazardous material delivered to Central Receiving is entered into the HMMS inventory and labeled with a yellow bar code sticker.

Find a Safety Data Sheet (SDS)

A chemical's Safety Data Sheet (SDS) provides chemical identification, hazards, first aid, handling & storage, exposure controls, disposal and other regulatory information. You can find SDSs at <https://goddard.hill.af.mil/pls/msds/> (must use Internet Explorer). For help with this website, please view the [full instructions for searching the database](#).

Alternate SDS Sites

HMMS SDSs are also available on a [different style website](#). Our last SDS database (not updated recently) is [MSDSPro](#). You may also find [Princeton's SDS website](#) helpful.

Obtain Material

Buying New

If you order hazardous materials (HM), buy it through Stores Stock / Advanced Materials Management System (AMMS). If you know the AMMS stock number, order it directly at the [AMMS website](#). If the item you want does not have an AMMS stock number, fill out [GSFC form 20-19](#) (you can also [search for the form](#)). Then, email this form to GSFC-HMMS-Support@mail.nasa.gov. If you need help, [email us](#) or call x6-HMMS (301-286-4667).

Reusing Existing

HM turned in by other Goddard employees are available for reuse. Visit the [HM Reuse Center](#) to learn more about these materials and the HM reuse program.

Turn in Material

Full or Partially Full Containers

Full or partially full containers, and aerosol cans, can be picked up with an [eMOD request to Code 250 for "Request for Waste Characterization"](#). We reuse, recycle, or dispose of the material properly.

Empty Containers

For empty containers, [request an "Empty Container Pick-up With a Yellow Inventory Sticker"](#) through Code 270 in eMOD (under the Transportation section). Or call x4-4667 or [email us](#) if you would rather just send the sticker.

Program Contacts

HMMS Support: GSFC-HMMS-Support@mail.nasa.gov, 6-HMMS (301-286-4667)
